Varnish

APC, Redis, Memcache

Employment

Code Culture

2004 - present

Founder / Owner

Self-employed / freelance web developer. Predominantly Drupal CMS development, template building, extension development, training and consultancy. Previously also Joomla and Magento development.

Universiteit van Amsterdam

2001 - 2005

Electronic Learning Environment Administrator

Support of education with new media in both the classroom and online. System administrator of the electronic learning environment Blackboard. Assistance of both lecturers and students in new media projects and initiatives.

Education

University of Amsterdam

Cultural Anthropology and Sociology of Non-Western Societies (1998-2004)

Technical University Delft

Geodetic Engineering (1996-1998)

Dalton Scholengemeenschap, Voorburg

VWO / Gymnasium (1994-1996)

St. Oelbert Gymnasium, Oosterhout

Gymnasium (1990-1994)

Selected Projects

Flink

2018 - 2021

Internet agency

Freelance Drupal back-end developer. We worked in small agile teams to create several client projects. Most notably websites for the Dutch Water Sector, Madurodam, FME, Synerkri and others.

RNW Media

2020

NGO

RNW Media is an NGO that spawned from the Dutch broadcasting world service (Wereldomroep). As a dedicated Drupal developer I supported their programme of promoting topics like equal rights, civil liberties, free press, by building various websites all over the world. These websites have millions of views each year and published content in many languages and locales.

Dutch Chamber of Commerce

2018 - 2020

Connecting Entrepreneurs

Front-end restructuring and back-end development for nlgroeit, a platform to connect successful business owners with one another in mentor / mentee roles.

TransFollow

2015 - 2019

Digital Logistics

TransFollow develops various digital products for logistics services. We created a portal displaying essential information when loading and shipping dangerous goods by road. For their main electronic waybill product we developed a responsive product website.

Tradus

2017

Marketplace for heavy machinery

Online verticals multinational OLX started a global marketplace for heavy machinery in 2017. We grew this platform to be market leading in volume within 6 months of launch, containing about half a million ads in multiple countries.

PostNL

2017

Developer portal

Dutch mail and parcel distributor PostNL has a wide range of APIs that developers can use for parcel tracking, postal code lookups, and much more. For reference to developers we built a portal containing extensive api documentation and a sandboxing tool to test api functionality.

Beurtvaartadres

2012- 2016

Logistics

The company site we inherited was built by inexperienced developers. We restored maintainability by unhacking the code, setting up a proper multi-site environment, implementing multilingual modules and workflow. Other assignments included updating the themes to a new layout, migrating content and supporting their in-house developers.

2Value

2007 - 2016

Multiple websites and training sessions.

As a freelancing associate of 2Value I've been employed in many roles: developer, consultant, trainer and tester, to name a few. I've built various implementations of their company website and several internal applications. Among these are a webshop, a wiki, a payment and accounting system and a project management platform.

I've have been training of both Drupal and Joomla developers in using proper development tools and strategies such as: Git, Subversion, DTAP. To get more Drupal expertise within 2Value's developer network

I've set up a Drupal junior developer course spanning a week of full time training and a month of applied mentoring.

Dutch Provinces

2014 - 2016

Geo-information platforms

Audit and development of two maps platforms of the Dutch provincial governments to publish geo-information concerning the location and details of both industrial zones and water quality.

Proserve

2016

Corporate website

At identify firm Total Active Media we've implemented a completely new design for hosting service provider Proserve. My role involved tasks like front-end development, website configuration, responsive site setup. This website was featured on Adobe's behance.net as a showcase in early 2017.

Clients

Dutch Government

Prototype of the Dutch Tax Department pre-filled tax return forms

McDonalds

HTML mail campaign

Rabobank

Testing and fixing the new corporate layout

Equens

Converting their website to a new HTML theme after a merger

Dutch National Archive

Adapting their website to a new corporate identity

Alternatief voor Vakbond

Website for a new dutch labour union

University of Amsterdam

Electronic Learning Environment administrator

University of Amsterdam

Set up and training for the first university wide CMS

Eden Design (Eden Spiekermann)

Various frontend development and accessibility jobs
